

My Five Senses

There is an eardrum in my ear,
Which vibrates when I need to hear,
It sends a message to my brain,
So that I can hear the pelting of the rain.

My blue eyes are what make me, me,
They also are, how I see,
Without them I'd be lost on Mars,
But with them I can stare at stars!

I can feel with everything from head to toe,
My sense of touch tells me if it's hot or cold,
I can also feel pressure and pain,
And true touch/braille helps the blind not the lame.

My tastebuds taste my food for me,
And tells me if it's bitter or sweet,
They tell me the difference between coffee and tea,
And if it is a carrot or a pea.

On my face I have a nose,
It helps me smell things such as a daffodil or a
Rose,
It also helps me to enjoy my food,
So as you can see, it puts me in a good mood!

These are my five senses,
I use them everyday,
Without them I could not survive,
I could not even play!
